- Great performance under pressure
- Ease when following orders and carrying them out productivelyEase when following orders and carrying them out productively
- Advanced analysis skills, able to correct and avoid errors in your pathAdvanced analysis skills, able to correct and avoid errors in your path
- Able to perform excellent teamwork using social skills
- Calm but confident and responsible with his tasks

WORK EXPERIENCE

Comfenalco - React Web Developer
Remarkable Details
(February 2023 - August 2023)
As a Web Developer at Comfenalco I was continually developing several screens at a visual and functional level for comfeweb and at the same time other projects, consuming APIS that they provided me, at the same time solving bugs and analyzing the operation of the product before moving on to a trial period for further development effectiveness.

- Development web Front-end
- JavaScript, TypeScript, HTML
- CSS - Tailwind - Bootstrap
- React and Angular
- Development with Microfrontend structure
- GIT
- SCRUM
- Devops
- PostMan

Connect2BPO - Software Developer
Remarkable Details
(March2024 - at the moment)
I have developed frontend applications in Angular (v12-17) and backend with Node.js, creating scalable APIs and architectures. I manage MongoDB to optimize queries and data and have maintained Angular applications ensuring efficiency. Additionally, I prepare tailored tech estimates and have implemented solutions in projects, meeting specific requirements and guaranteeing a high-quality user experience.
